

MESOVITA

vitamin treatment

MesoVita® nourishing vitamin cream is a potent dermal infusion, rich in polyunsaturated fatty acids, omega-3 & 6, linoleic and linolenic acids. MesoVita® combines all the vitamins commonly used in mesotherapy (A, E, C, F, B-complex, K) with manganese, iron, zinc, magnesium and calcium, to revitalize and rejuvenate the skin.

MesoVita® delivers the following specific benefits:

- ✓ Injects vital bio-nutrition into the skin cells.
- ✓ Antioxidant action protects the cells against free radicals that cause skin ageing.
- ✓ Reduces wrinkles and tightens loose skin.
- ✓ Improves the tone and texture of sun-damaged skin.
- ✓ Stimulates cell renewal.
- ✓ Infuses the skin with a healthy, youthful glow.

For optimal results, MesoVita® nourishing vitamin cream is the indispensable cosmetic complement to your professional mesotherapy treatment.
